

# Welcome to Today's Class!

Today's Topic: AI Fakes: How can we tell what is real and what is not?

Artificial intelligence can now create very realistic photos, videos, and even voices. Sometimes they are used for entertainment, but sometimes they are used to spread misinformation, commit fraud, or manipulate people. How we can recognize when something online might not be real?

## Agenda:

1. Review the video and vocabulary
2. Breakout room discussions
3. Large group wrap-up

# Let's Talk: Discussion Questions

1. Have you ever seen a fake photo or video online that looked real? Did you realize it was fake immediately?
2. What are some clues that make you trust or doubt an image, video or voice clip?
3. Should AI-generated media be required to add warning labels? (ex. "this is an AI-generated image/video.")
4. In the future, do you think it will become impossible to know what is real online? Will AI make it impossible to trust images online?
5. Could deepfakes damage someone's reputation?
6. Should governments regulate AI images and videos?
